Projects

BitcoinAnalysis March 2018

- A program in R that takes data from Kaggle of Bitcoin prices from the years of 2013 to the beginning of 2018
- Uses the ggplot2 library for scatter plots, dataframes to store data, and summary statistics to show rise and fall of Bitcoin during this time

FoodApp March 2019 - December 2019

- A Python3 script showing users the best price to review ratio of nearby restaurants. The Google Maps API provided the data of the nearby restaurants.

Employment History

Chapman University: Orange, CA December 2018 – May 2019

Tutoring, Learning, and Testing (TLT) center

- Student Tutor for Mathematics and Computer Science

Ludwig Klein Court Reporting: Pasadena, CA Summer 2017

- Instrumental in the selection of their computer system
- Assessed their computer needs to run their appropriate software
- Worked directly with the owner to discuss the system’s goals and budget

Volunteer Work

United Armenian Congregational Church (UACC): Los Angeles, CA June 2016 and 2018
